# ADVANCED ACCESS CONTROL

## Technological development and integration

combined with sophisticated software have allowed access control systems to be extended embracing many other security techniques. This training course develops the delegates knowledge by delving into emerging product innovations including biometrics, TCP/IP, RFID and smart card solutions, all of which are likely to be used in new security systems or to enhance those already in existence.

### COURSE CONTENT

- ▶ Third party protocols of readers and cards
- ▶ Biometric access control systems
- ▶ IP and network integrated access
- ▶ Topology of traffic barriers, gates and turnstiles
- ▶ Hands free access
- ▶ Card security and legislation essentials
- ▶ Time and attendance
- ▶ Implementation of standards and procedures
- ▶ Standards, Inspectorates, associations and governing bodies
- ▶ Planning and design of sophisticated access control systems

»  
Exceptional as always.

TYCO INTEGRATED SYSTEMS DELEGATE

**BTEC**  
PROFESSIONAL AWARD

### COURSE DATES

#### 2015

JANUARY	5 - 7
JUNE - JULY	29 - 1
SEPTEMBER	2 - 4
NOVEMBER	2 - 4

#### 2016

JANUARY	5 - 7
---------	-------

### COURSE COST, DURATION AND AWARD

£1150.00 + VAT

Duration: **3 days**

BTEC Diploma Points: **3**

Course fee includes  
**BTEC level 4 certificate**

**This in-depth course coverage of access control systems will enable technicians and engineers to master their profession and enhance their career development potential.**
