

# MANAGING CYBER CRIME

34

CYBER AND IT SECURITY COURSES

**Do you manage or control Security, Facilities, Operations, Estates or CCTV Systems?** Are you fully aware of the impact that cyberspace is already having on your existing systems and all aspects of your business and domestic life? Drawing on expert support from Advent IM, Tavcom offers a fascinating introduction to the world of cyber and its impact on all aspects of the physical world and looks at ways in which security of existing physical systems can be hardened by robust cyber security measures and processes.

## COURSE CONTENT

- ▶ Introduction to assessment and management of Threat
- ▶ Introducing the Cyber Threat
- ▶ Understanding Threat Convergence
- ▶ Cyber-speak, an introduction for the lay person
- ▶ Cyber and the Internet
- ▶ Fundamentals of Cyber Security
- ▶ Principles of Risk Management
- ▶ Selecting appropriate Risk Mitigation Options
- ▶ Practical Exercise - bringing it all together
- ▶ The benefits of getting it right and the cost of getting it wrong - real examples from the real world

Outstanding. Would love to come back for more training in this relaxed and friendly venue...

CAMBRIDGE CITY COUNCIL DELEGATE

## COURSE DATES

### 2015

JULY	21
SEPTEMBER	8
NOVEMBER	3

### 2016

JANUARY	6
MARCH	22

## COURSE COST, DURATION AND AWARD

**£350.00 + VAT**

Duration: **1 day**

**Many businesses and organisations are looking to include cyber in threat assessments but not everyone has a background that includes this discipline. This course is designed for non-cyber practitioners/managers in the physical world to learn and understand the basics in this increasingly pertinent area.**
